# VERTICAL BOARD & BATTEN STEEL SIDING

## WHY CHOOSE STEEL AND NOT VINYL?

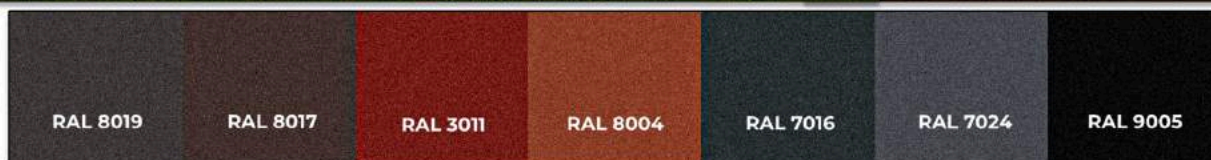

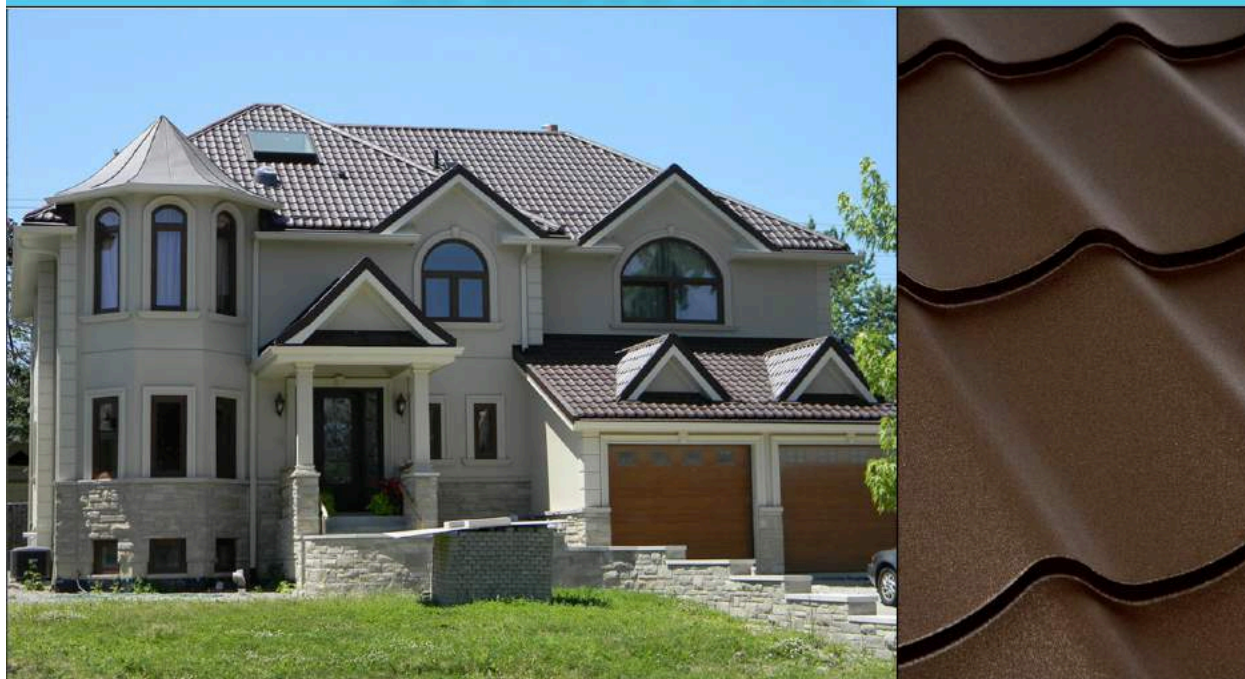

In Canada's extreme weather, vinyl, and aluminum siding face problems. They crack when it's cold and warp with the heat. Fixing them helps, but they never look the same. Our Vertical Board-and-Batten Steel Siding is different. It's tough, keeps its good looks for years, and doesn't need much care. This steel siding is a better choice, offering peace of mind and long-term value. It's a smart pick for anyone in our harsh climate, keeping your home looking good and standing strong.
